

## Industrial Maintenance Management Training Services

DENCO's management professionals offer a world-class training and facilitating product. Our clients are from all types of industry in North America. Our main objective is to assist our clients by training their personnel and guiding them to success. Our training packages come complete with reference materials and certificates. Certification can also be obtained by completing a group of courses relating to specific areas of maintenance.

DENCO Planning Services can play a major role in aiding organizations to achieve "Maintenance of Excellence" status, assisting in the maintenance of economic goals, and providing maintenance operation consistency and standards.

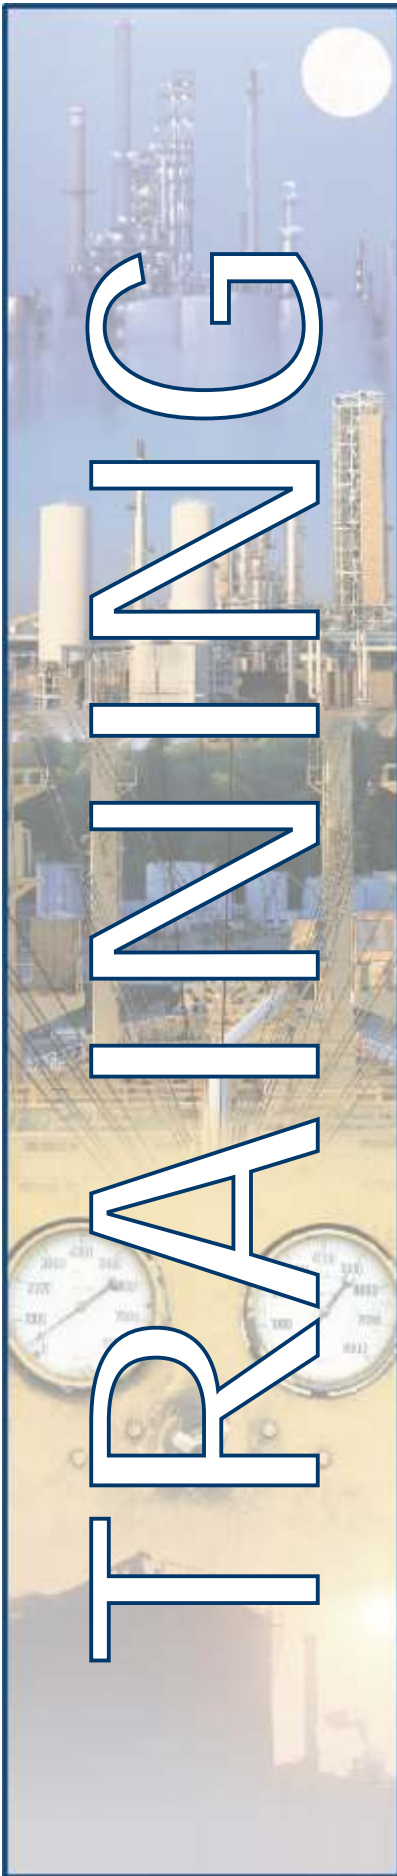

The DENCO professionals have the tools and resources to help organizations achieve their goals. These are assessments, audits, and training and facilitating of maintenance improvement implementation.

### Our Approach

DENCO has developed its products by structuring them around best practice and results that are based on fact. In order to maintain a high standard of practice and consistency, the need to train personnel and management is essential. DENCO instructors promote in-class demonstrations and initiate interaction with students to effectively solidify the training materials. This enables individuals to transfer and integrate their newly acquired knowledge and skills into their day-to-day maintenance activities.
